***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Brien in view of Hwang.

O'Brien discloses cords 60 extending through cord covers 28 which are attached to the shade via stitching, Fig. 2. The stitching has portions which are "spaced" from other portions thereof. What is not disclosed is the brake. However, such is well known as illustrated by Hwang at 40. Since O'Brien states that the cords are "tied off", column 6, line 62, it would have been obvious to provide O'Brien with such a brake so as to maintain the curtain in a raised position.

Another way of providing the spaced positioning elements is also taught by Hwang. Rings 53 are spaced apart to provide the conventional appearance of wide pleats. In view of this teaching, it would have been obvious to modify O'Brien whereby his cord covers 28 are only attached to the shade at spaced locations.
